

VYVGART[®]
(efgartigimod alfa-fcab)
Injection for Intravenous Use
400 mg/20 mL vial

Insurance and coverage guide

Here to help you navigate your VYVGART treatment journey

- ➔ Understand your insurance
- ➔ Navigate VYVGART cost and coverage
- ➔ Explore potential financial assistance programs

What is VYVGART[®] (efgartigimod alfa-fcab)?

VYVGART is a prescription medicine used to treat a condition called generalized myasthenia gravis, which causes muscles to tire and weaken easily throughout the body, in adults who are positive for antibodies directed toward a protein called acetylcholine receptor (anti-AChR antibody positive).

SELECT IMPORTANT SAFETY INFORMATION

VYVGART may increase the risk of infection. In a clinical study, the most common infections were urinary tract and respiratory tract infections.

Please see Important Safety Information on page 6.

Please see accompanying full Prescribing Information or visit [VYVGART.com/PI](https://www.vyvgart.com/PI).

Understand your insurance

VYVGART has **coverage** from both national and regional payers, with about 85% of insurance plans offering coverage for VYVGART. However, your insurance coverage for VYVGART depends on the terms and conditions listed in your insurance plan.

- ➔ **Coverage** is your legal entitlement to payment or reimbursement for certain healthcare costs. Generally, this is specified under a contract with a health insurance company, a group health plan offered in connection with employment, or a government program like Medicare or Medicaid.

Medicare

Medicare is a federal insurance program for adults aged 65 years or older. Younger individuals with certain types of disabilities or permanent kidney failure may also qualify.

Medicare may cover treatments for FDA-approved indications. This insurance program has four parts (A, B, C, and D) that provide a specific type of coverage.

- ➔ Medicare Part A provides coverage for costs incurred in the hospital
- ➔ Medicare Part B provides medical insurance
- ➔ Medicare Part C (Medicare Advantage) provides Part A and Part B benefits
- ➔ Medicare Part D may help pay for prescription drugs
- ➔ Medicare Supplement Insurance (Medigap) is supplementary Medicare insurance that is sold by private companies to fill gaps in Original Medicare

Medicaid

Medicaid is a health insurance program that is administered by the government. Medicaid may provide coverage for families with low income, individuals who are pregnant, older adults, and people with disabilities. Each state has different eligibility rules.

Commercial insurance

Commercial insurance, also called private insurance, is provided and administered by a private insurance company. You may receive this insurance from your employer or purchase it from the Health Insurance Marketplace.

No health insurance

If you do not have insurance, you can purchase a health insurance plan from the Health Insurance Marketplace during Annual Enrollment or a qualifying life event. Reviewing a plan's summary of benefits and coverage (SBC) can be helpful when deciding on which plan to choose.

- ➔ An SBC is a short, plain-language summary about a health plan's benefits and coverage that you can use to review the benefits and cost of an insurance plan

My VYVGART[®] *Path*

We can help you understand your insurance coverage!

My VYVGART Path is a Patient Support Program that provides personalized support from committed Nurse Case Managers and Case Coordinators. The team at My VYVGART Path can help you navigate your insurance and understand your insurance plan.

➔ ***Ask your doctor to enroll you in My VYVGART Path***

Navigate VYVGART cost and coverage

Your **out-of-pocket** cost for VYVGART may vary depending on your insurance plan. Different factors such as your insurer's **co-pay, co-insurance, deductible, site of care, and out-of-pocket maximum** requirements for medications may impact your treatment cost. Where you receive treatment and whether your provider or specialty pharmacy is in **network** may also affect your out-of-pocket costs.

- **Out-of-pocket cost** is the amount of money you pay for medical care that your insurance does not reimburse
- A **co-pay**, also called co-payment, is a fixed amount (flat fee) that you pay for a covered healthcare service after paying your deductible
- **Co-insurance** is the amount of money you pay for covered healthcare services. Your co-insurance is usually a percentage of the healthcare cost
- A **deductible** is the amount you are required to pay for covered healthcare services before your insurance plan starts paying
- **Site of care** is the physical location of infusion administration. Examples of a site of care include hospital inpatient, hospital outpatient, physician office, ambulatory infusion site, and home-based setting
- An **out-of-pocket maximum** is the total amount you're required to pay for covered services within a given plan year. Your health plan may pay 100% of the costs of covered benefits after you spend this amount on deductibles, co-payments, and co-insurance for in-network care and services
- A **network** is the healthcare providers, facilities, and suppliers that your health insurer or plan contracts with to provide healthcare services

Do you need prior authorization for VYVGART?

Most insurance companies need to pre-approve specific healthcare services, prescriptions, or equipment before you can receive it. This process for getting approval is called a prior authorization (pre-authorization).

⚠ Each insurance company's timeline for the VYVGART prior authorization process may vary. Medicare does not require prior authorization. Reach out to your Nurse Case Manager if you have questions about the process or need an update.

Explore potential financial assistance programs

If you have financial concerns or gaps in your insurance coverage, My VYVGART Path may be able to provide you with personalized support, resources, and information.

Once your doctor enrolls you in My VYVGART Path, the team will complete a benefits investigation to help provide you with personalized information about your insurance coverage, potential financial assistance programs, and possible out-of-pocket costs.

Nurse Case Managers may also refer you to charitable foundations that may be able to assist with your out-of-pocket costs.

- ➔ **If you have commercial or private insurance** you may be eligible for assistance through the VYVGART Co-pay Program. Eligible commercially insured patients may pay as little as \$0 for VYVGART and may receive a maximum benefit of \$25,000 per calendar year for their eligible out-of-pocket costs for the drug and drug administration
- ➔ **If you do not have health insurance**, you may be eligible for financial assistance through the My VYVGART Path Patient Support Program

➔ **Start the conversation.
Ask your doctor

My VYVGART Path.**

If you're already enrolled in the program, call 1-833-MY-PATH-1 (1-833-697-2841) to speak with a Nurse Case Manager.

IMPORTANT SAFETY INFORMATION

What is the most important information I should know about VYVGART[®]?

VYVGART may cause serious side effects, including:

- **Infection.** VYVGART may increase the risk of infection. In a clinical study, the most common infections were urinary tract and respiratory tract infections. More patients on VYVGART vs placebo had below normal levels for white blood cell counts, lymphocyte counts, and neutrophil counts. The majority of infections and blood side effects were mild to moderate in severity. Your health care provider should check you for infections before starting treatment, during treatment, and after treatment with VYVGART. Tell your health care provider if you have any history of infections. Tell your health care provider right away if you have signs or symptoms of an infection during treatment with VYVGART such as fever, chills, frequent and/or painful urination, cough, pain and blockage of nasal passages/sinus, wheezing, shortness of breath, fatigue, sore throat, excess phlegm, nasal discharge, back pain, and/or chest pain.
- **Undesirable immune reactions (hypersensitivity reactions).** VYVGART can cause the immune system to have undesirable reactions such as rashes, swelling under the skin, and shortness of breath. In clinical studies, the reactions were mild or moderate and occurred within 1 hour to 3 weeks of administration, and the reactions did not lead to VYVGART discontinuation. Your health care provider should monitor you during and after treatment and discontinue VYVGART if needed. Tell your health care provider immediately about any undesirable reactions.

Before taking VYVGART, tell your health care provider about all of your medical conditions, including if you:

- Have a history of infection or you think you have an infection

- Have received or are scheduled to receive a vaccine (immunization). Discuss with your health care provider whether you need to receive age-appropriate immunizations before initiation of a new treatment cycle with VYVGART. The use of vaccines during VYVGART treatment has not been studied, and the safety with live or live-attenuated vaccines is unknown. Administration of live or live-attenuated vaccines is not recommended during treatment with VYVGART.

- Are pregnant or plan to become pregnant and are breastfeeding or plan to breastfeed.

Tell your health care provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the common side effects of VYVGART?

The most common side effects of VYVGART are respiratory tract infection, headache, and urinary tract infection.

These are not all the possible side effects of VYVGART. Call your doctor for medical advice about side effects. You may report side effects to the US Food and Drug Administration at 1-800-FDA-1088.

What is VYVGART?

VYVGART is a prescription medicine used to treat a condition called generalized myasthenia gravis, which causes muscles to tire and weaken easily throughout the body, in adults who are positive for antibodies directed toward a protein called acetylcholine receptor (anti-AChR antibody positive).
